**Subject:** Passaic Work

Walter,

At our meeting last week, Catherine and you mentioned being on the river to observe some work being done. Our current plan is to start sampling in early October. Sampling will continue through year-end. I would suggest a window of October 15-30th for a possible trip. Work will be done daily and we could pick a day that meets your schedules and adjust as necessary for weather.

Let me know your interests and we can accommodate accordingly. Look forward to the opportunity.  
Thanks

Mike Anderson
